## Professional Profile

Senior Mobile Engineer with 8+ years of experience building, launching, and maintaining high-quality mobile applications for enterprise and startup environments. Specialized in React Native and Expo, with deep experience owning mobile products end-to-end, from architecture and development to store deployments and long-term support.

## Key Mobile Expertise

- React Native & Expo
- App Store & Play Store Deployments
- Mobile CI/CD Pipelines
- Production React Native & Expo upgrades
- Advanced UI animations & gestures
- Tailwind-based design systems
- Performance Optimization

## Professional Experience

### BILDIT — Lead React Native Engineer (2023–2025)

- Lead developer for the **El Palacio de Hierro mobile app**, one of the **top Shopping apps in Mexico**.
- Owned the complete mobile lifecycle: architecture, feature development, CI/CD, App Store & Play Store deployments, and long-term support.
- Delivered and maintained core e-commerce features used by a large user base in production.
- Successfully executed **React Native, Expo, and dependency upgrades** in a live, high-traffic application.
- Ensured stability and performance during peak traffic periods and critical releases.

### Lithios — Lead Mobile Engineer (2021–2023)

- Led mobile development across multiple client projects, delivering **5 mobile applications** end-to-end (development, production deployment, and long-term support).
- Implemented core app features including authentication, payments, push notifications, analytics, and advanced gesture-based animations.
- Built and maintained **4 web platforms**, owning development, deployments, and ongoing maintenance.
- Worked directly with clients to define requirements and ensure successful delivery.

### GrainChain — React Native Developer (2020)

- Developed **two production, local-first mobile apps** for the agriculture industry with **complex, data-driven UIs**.
- Owned the **full development lifecycle** as an individual contributor, working with **agile methodologies** from development through deployment and support.
- Established and refined **React Native best practices** that shaped long-term maintainability and development workflows.

### 2017 – 2019

- Worked across **mobile (Android, React Native)** and **web** projects for clients in finance, services, and consumer-facing industries.
- Delivered production mobile apps for international clients and local enterprises.
- Built Android applications in Kotlin and contributed to fullstack web platforms (React, Node, Next.js).
- Gained early experience working directly with clients, demos, and real business requirements.
